

Review of the first Quarter of 2015

2015 has had a promising start for us. Beside the fact that we welcomed a new colleague, we have also had positive results regarding product-development: some long-term test phases are finally passed which means we can offer exciting new products soon. You'll read more about it later in this newsletter.

Cableties

As off the first of February our partnumbers for the cableties changed. If you haven't received a copy yet, please check the cross-reference list at the bottom of this newsletter.

New functions on the website

Our website has been of the air several times in January and February due to maintenance. We realize this has caused problems and inconvenience for you and do sincerely apologize. The search function has been improved and we have added 'related products' to most of our articles.

Price Increase for customers purchasing in Euro.

You will have noticed that the dollar exchange rate has changed significantly. Besides that, prices of raw materials, energy and transport in recent years have increased significantly. Therefore we are faced with price increases from producers where we purchase our products.

To date, these costs have been fully absorbed by Ripca because we wished to keep any price increases to a minimum. Unfortunately for the first time since January 2014, these substantial differences must be implemented in our sale price.

Consequently, we are forced to implement a price increase from April the 1st of 2015 for various products.

With regret this means that for the majority of the terminals (except for battery terminals) there will be an increase of **7,5%**. The terminal insulation products and busbars will have an increase of **12,5 %**, caused by an extra 5% increase of our supplier.

As of April the 1st of 2015, please refer to our website under the heading "Price Changes". Here all the price changes for the products you are purchasing from us will be displayed.

We rely on your understanding and look forward to continuing our good cooperation.

NEW: Hand wash

NEW: Switch Panel

What can you expect from us?

Warm Water system

The first working prototype of our own handwash is ready for demonstration. The device provides warm water to wash your hands and can be easily installed in the back of a van.

Ask your representative for a custom demo.

Switch panel

A fully programmable, flexible switch panel has been developed by our engineers.

The panel can be used for controlling all types of purposes, and is programmable: besides a simple on/off function you could also think of a timer release function for example. The usage of several panels is of course possible, single buttons can even be linked between separate panels.

New Products

PDS-6

As an alternative to our PDS-10 (10 ampere output) we are happy to offer you our attractive priced PDS-6 (6 ampere output).

This motion activated switch for 12 and 24 volt systems makes use of a passive Infra-red detector. When there is no motion detected the PDS-6 switches off with a programmable delay.

New Automotive cable

We are excited to offer you our newest Automotive Cable that meets ISO standard 6722 T3.

The cable is available in several sizes going from 16 mm² to 95 mm² and has a temperature rating that goes from -40°C to +125°C.

This cable is highly suitable for usage in vehicles that are powered by the new Euro 6 fuel.

Available colors are red and black.

DashCams

Although the dashcam's are not a brand new product, it is worth mentioning them over here.

After testing several brands and models we have decided to put the PapaGo cameras in our assortment.

These cameras are distinguished in comparison with other models. This is mainly due to the excellent image quality and the extensive features the camera's offer. Lane departure warning, Speedcam recognition (can be switched of) and excellent view at night time are just a few examples.

NEW: PDS-6

Regular price: € 40,-

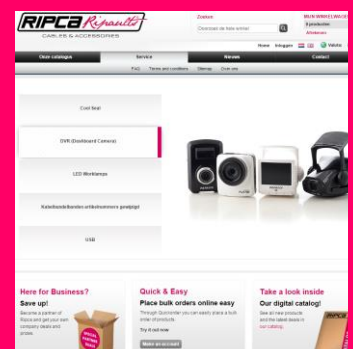

NEW: Automotive Cable

Dash Cam's
